

The human body and farm animals: Me and my small world

What should I already know?

- That humans look similar and different.
- Humans have the same body parts.
- Name some features of the human body including eyes and nose.
- Be able to name some common animals.

Key Knowledge

The human body parts

- To identify and name the following parts of the human body: head, mouth, teeth, body, arm, hand, leg, foot.

To know some ways that we use those parts of our body:

- Head: to turn and look in different directions.
- Mouth: moves when we speak.
- Teeth: help us to chew and eat food.
- Arms and hands: help us to move, lift and write.
- Legs and feet help us to stand and move such as walking and running.

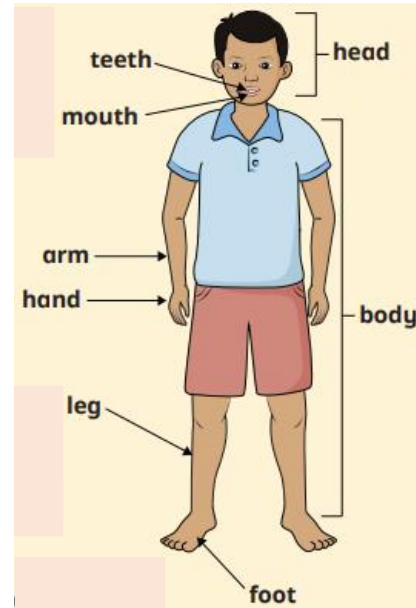

Naming farm animals and talking about their key features:

- To name animals that live on a farm such as horses, pigs, cows, chicken and sheep.
- To name some of their features for example, a sheep lives on a field, it has 4 legs, a woolly coat and says "Baaa".
- To name some places that farm animals live: field, sty, barn, stable, coop. For example, a pig lives in a sty, chickens live in a coop.

Key Vocabulary and definitions

<b>field</b>	A large space outside on a farm usually covered in grass sometimes with animals such as sheep, goats, cows.
<b>Sty</b>	Where pigs live.
<b>Barn</b>	A big building on a farm which can have animals in.
<b>Stable</b>	A building for animals like horses and cows.
<b>Coop</b>	A place for chickens.

Additional key vocabulary linking to pictures below.

A horse in a stable
