

On Thursday 15th June it was Clean Air Day. We spoke directly to the children about idling and encouraged them to remind adults to turn the engine off when stationary. This was done as part of our pollution assembly around Clean Air Day however, we have been informed by Leicester City Council that there is a large amount of idling in the streets around our school during drop off and pick up times.

This is a huge concern to us as the amount of pollution caused from idling is considerable and could have a very negative impact on the health and wellbeing of your children as they go in and out of school.

We would like to urge you to turn your engine off if waiting outside of school and help us to reduce the amount of idling and in turn the amount of pollution in our local area.

Thank you

Overdale Infant School
