

Our wonderful world

What should I already know?

- How to plant a seed and care for it so it can grow.
- Know that our world has lots of different places such as the sea, cities and villages.
- Know that we should not litter.

Key Knowledge

- It is important that we help to look after the world we live in.

We can look after our world by:

- Not littering and putting rubbish in the bin. This keeps our parks, streets and playgrounds nice and clean.
- Not littering helps animals stay safe because litter can hurt them.
- Not littering keeps flowers and trees healthy so they can grow big and strong.
- We can recycle which means using things again so we do not throw too much away.

We can look after wildlife and minibeasts by:

- Looking after flowers and plants.
- Plants make animals like bees and butterflies want to come and visit them. When these animals visit, they help the plants make new flowers and seeds.

Key Vocabulary and definitions

| | |
|--|---|
| litter | Rubbish that is thrown on the ground instead of being put in the bin. |
| recycle | Turning old things into new things. Instead of throwing them away, we can make them useful again. |
| plastic | A material. |
| minibeast | Tiny animals that live outside like worms and snails. |
| wildlife | All animals and plants that live outside. People do not need to take care of them. |
