Overdale Infant School: Elements of Design and Technology - Progression Map

Intent

- To be designers and design items for a purpose.
- To make meaningful creations.
- To be confident in using a range of tools and techniques
- To use their imagination to design and create.
- To take risks when designing and making.
- To evaluate technology and develop a critical understanding of its daily life in the wider world.

Developm	National Curriculum KS1	
 Explore different materials freely, in order to develop their ideas about how to use them and what to make. Develop their own ideas and then decide which materials to use to express them. Join different materials and explore different textures. 	 Return to and build on their previous learning, refining ideas and developing their ability to represent them. Create collaboratively, sharing ideas, resources and skills. Safely use and explore a variety of materials, tools and techniques, experimenting with colour, design, texture, form and function Share their creations, explaining the process they have used. Make use of props and materials when role playing characters in narratives and stories. 	Through a variety of creative and practical activities, pupils should be taught the knowledge, understanding and skills needed to engage in an iterative process of designing and making. When designing and making, pupils should be taught to: Design • design purposeful, functional, appealing products for themselves and other users based on design criteria • generate, develop, model and communicate their ideas through talking, drawing, templates, mock-ups and, where appropriate, information and communication technology Make • select from and use a range of tools and equipment to perform practical tasks [for example, cutting, shaping, joining and finishing] • select from and use a wide range of materials and components, including construction materials, textiles and ingredients, according to their characteristics Evaluate • explore and evaluate a range of existing products • evaluate their ideas and products against design

criteria
Technical knowledge
 build structures, exploring how they can be made stronger, stiffer and more stable explore and use mechanisms [for example, levers, sliders, wheels and axles], in their products

	Pre-school	Reception	Year 1	Year 2
Design	Structures Junk Modelling • Making verbal plans and material choices. • Developing a junk model.	Structures Junk Modelling Making verbal plans and material choices. Developing a junk model. Boats Designing a junk model boat. Using knowledge from exploration to inform design. Textiles Bookmarks Discussing what a good design needs. Designing a simple pattern with paper. Designing a bookmark. Choosing from available materials.	 Structures Constructing a windmill Learning the importance of a clear design criteria. Including individual preferences and requirements in a design. Mechanical Systems Moving storybook Explaining how to adapt mechanisms, using bridges or guides to control the movement. Designing a moving story book for a given audience. Textiles Puppets Using a template to create a design for a puppet. 	Structures Baby bear's chair • Generating and communicating ideas using sketching and modelling Mechanical Systems Fairground wheel • Selecting a suitable linkage system to produce the desired motion. • Designing a wheel. Textiles Pouches • Designing a pouch.

Structures

Junk Modelling

- Improving fine motor/scissor skills with a variety of materials.
- Joining materials in a variety of ways (temporary and permanent).
- Joining different materials together.

Structures

Junk Modelling

- Improving fine motor/scissor skills with a variety of materials.
- Joining materials in a variety of ways (temporary and permanent).
- Joining different materials together.
- Describing their junk model, and how they intend to put it together.

Boats

• Making a boat that floats and is waterproof, considering material choices.

Textiles

Bookmarks

- Developing fine motor/cutting skills with scissors.
- Exploring fine motor/threading and weaving (under, over technique) with a variety of materials.
- Using a prepared needle and wool to practice threading.

Structures

Constructing a windmill

- Making stable structures from card, tape and glue.
- Learning how to turn 2D nets into 3D structures.
- Following instructions to cut and assemble the supporting structure of a windmill.
- Making functioning turbines and axles which are assembled into a main supporting structure.

Mechanical Systems

Moving storybook

 Following a design to create moving models that use levers and sliders.

Textiles

Puppets

- Cutting fabric neatly with scissors.
- Using joining methods to decorate a puppet.
- Sequencing steps for construction.

Structures

Baby bear's chair

- Making a structure according to design criteria.
- Creating joints and structures from paper/card and tape.
- Building a strong and stiff structure by folding paper.

Mechanical Systems

Fairground wheel

- Selecting materials according to their characteristics.
- Following a design brief.

Textiles

Pouches

- Selecting and cutting fabrics for sewing.
- Decorating a pouch using fabric glue or running stitch.
- Threading a needle.
- Sewing running stitch, with evenly spaced, neat, even stitches to join fabric.
- Neatly pinning and cutting fabric using a template.

Evaluate	N/A	Structures Junk Modelling Giving a verbal evaluation of their own and others' junk models with adult support. Checking to see if their model matches their plan. Considering what they would do differently if they were to do it again. Describing their favourite and least favourite part of their model. Boats Making predictions about, and evaluating different materials to see if they are waterproof. Making predictions about, and evaluating existing boats to see which floats best.	Mechanical Systems Moving storybook Testing a finished product, seeing whether it moves as planned and if not, explaining why and how it can be fixed. Reviewing the success of a product by testing it with its intended audience. Textiles Puppets Reflecting on a finished product, explaining likes and dislikes.	Structures Baby bear's chair Testing the strength of own structure. Identifying the weakest part of a structure. Evaluating the strength, stiffness and stability of own structure. Mechanical Systems Fairground wheel Evaluating different designs. Testing and adapting a design Textiles Pouches Troubleshooting scenarios posed by teacher. Evaluating the quality of the stitching on others' work. Discussing as a class, the success of their stitching against the success criteria.
Eval		evaluating different materials		by teacher.
		evaluating existing boats to see which floats best.		stitching on others' work. • Discussing as a class, the success of their stitching against the success
		<u>Textiles</u>		
		Bookmarks		
		 Reflecting on a finished product and comparing to their design. 		

Technical

Structures

N/A

Junk Modelling

- To know there are a range to different materials that can be used to make a model and that they are all slightly different.
- Making simple suggestions to fix their junk model.

Boats

 To know that 'waterproof' materials are those which do not absorb water.

Textiles

Bookmarks

- To know that a design is a way of planning our idea before we start.
- To know that threading is putting one material through an object.

Structures

Constructing a windmill

- To understand that the shape of materials can be changed to improve the strength and stiffness of structures.
- To understand that cylinders are a strong type of structure (e.g. the main shape used for windmills and lighthouses).
- To understand that axles are used in structures and mechanisms to make parts turn in a circle.
- To begin to understand that different structures are used for different purposes.
- To know that a structure is something that has been made and put together.

Mechanical Systems

Moving storybook

- To know that a mechanism is the parts of an object that move together.
- To know that a slider mechanism moves an object from side to side.
- To know that a slider mechanism has a slider, slots, guides and an object.
- To know that bridges and guides are bits of card that purposefully restrict the movement of the slider.

Textiles

Puppets

- To know that 'joining technique' means connecting two pieces of material together.
- To know that there are various

Structures

Baby bear's chair

- To know that materials can be manipulated to improve strength and stiffness.
- To know that a structure is something which has been formed or made from parts.
- To know that a 'stable' structure is one which is firmly fixed and unlikely to change or move.
- To know that a 'strong' structure is one which does not break easily.
- To know that a 'stiff' structure or material is one which does not bend easily.

Mechanical Systems

Fairground wheel

 To know that different materials have different properties and are therefore suitable for different uses.

Textiles

Pouches

- To know that sewing is a method of joining fabric.
- To know that different stitches can be used when sewing.
- To understand the importance of tying a knot after sewing the final stitch.
- To know that a thimble can be used to protect my fingers when sewing.

	temporary methods of joining fabric by using staples. Glue or pins. To understand that different techniques for joining materials can be used for different purposes. To understand that a template (or fabric pattern) is used to cut out the same shape multiple times. To know that drawing a design idea is useful to see how an idea will look.
--	---

Additional	N/A	Structures Boats To know that some objects float and others sink. To know the different parts of a boat.	 Structures Constructing a windmill To know that a client is the person I am designing for. To know that design criteria is a list of points to ensure the product meets the client's needs and wants. To know that a windmill harnesses the power of wind for a purpose like grinding grain, pumping water or generating electricity. To know that windmill turbines use wind to turn and make the machines inside work. To know that a windmill is a structure with sails that are moved by the wind. To know the three main parts of a windmill are the turbine, axle and structure. Mechanical Systems Moving storybook To know that in Design and technology we call a plan a 'design'. 	Mechanical Systems Fairground wheel To know the features of a ferris wheel include the wheel, frame, pods, a base an axle and an axle holder. To know that it is important to test my design as I go along so that I can solve any problems that may occur.
------------	-----	--	---	---

Cooking and nutrition	Part of enrichment activities

Food

Rainbow salad

- Begin to understand and name some fruit and vegetables
- To understand some foods are healthy and unhealthy
- To know what a salad is
- To know what vegetables to put into a salad

Food

Fruit and vegetables

- Understanding the difference between fruits and vegetables.
- To understand that some foods typically known as vegetables are actually fruits (e.g. cucumber).
- To know that a blender is a machine which mixes ingredients together into a smooth liquid.
- To know that a fruit has seeds and a vegetable does not.
- To know that fruits grow on trees or vines.
- To know that vegetables can grow either above or below ground.
- To know that vegetables can come from different parts of the plant (e.g. roots: potatoes, leaves: lettuce, fruit: cucumber).

Food

A balanced diet

- To know that 'diet' means the food and drink that a person or animal usually eats.
- To understand what makes a balanced diet.
- To know where to find the nutritional information on packaging.
- To know that the five main food groups are: Carbohydrates, fruits and vegetables, protein, dairy and foods high in fat and sugar.
- To understand that I should eat a range of different foods from each food group, and roughly how much of each food group.
- To know that nutrients are substances in food that all living things need to make energy, grow and develop.
- To know that 'ingredients' means the items in a mixture or recipe.
- To know that I should only have a maximum of five teaspoons of sugar a day to stay healthy.
- To know that many food and drinks we do not expect to contain sugar do; we call these 'hidden sugars'.
